### EXPERIENCE

#### CDP360 Technologies, Chennai — *Front-end Developer*

March 2023 - PRESENT

Led the front-end development of multiple projects, implementing modern UI/UX practices. Extensive experience in utilizing including Virtual DOM, custom components, React-Router, and Redux for state management

### PROJECTS

#### Learning Management System(LMS) — *Reactjs, React Native*

Used ReactJS to create a user-friendly and interactive interface. Developed reusable components to maintain a consistent design and functionality across the platform. Implemented responsive design to ensure accessibility across various devices and screen sizes. Integrated OTP verification with a third-party integrated on ReactJS and React Native. Optimized the codebase resulting in 30% reduction in a page load times used for **ReactJS** and **React Native**

#### Online Exam PlatForm for NEET and JEE preparation —

*Reactjs, React native, Redux*

Provided students with a comprehensive online platform for NEET and JEE exam preparation. Offered a user-friendly interface with interactive features and tools to facilitate effective learning and exam practice used for ReactJS
